

SUMMER FIESTA 2023

JUNIOR

Reflectio

Day-3
15-05-2023
Monday

Master Chef

Master chef reflects mastery of cooking techniques. It is the peak in culinary expertise and skill. Here we are introducing our kids as a great cook who are proving themselves to be an expert of cooking using no fire.

It is just to impress their mothers with their skills. As we all are fond of yummy food let's celebrate Our Summer Fiesta with a great introduction of different dishes. Our genius students from Nursery to STD II will explore the techniques of cooking on this special Day of Summer Fiesta. The students will have a great experience of cooking without fire.

Students will develop intellectual skill through this activity and will present yummy and delicious food in a good presentation by plating with their own creativity. It is the art of creativity and skill of combining different ingredients which helps to perform well in preparing different dishes.

Our nursery students enjoyed making Banana sandwich. Students of Prep were excited making Fruit salad, Std-1 students were overjoyed making Veg sandwich and std-2 were super excited making the Indian chaat.

This activity made students really enjoyable.

SUMMER FIESTA
2023

Rain Dance

To beat the heat of the summer a “Rain Dance Party” was held in our school premises for students of Nursery to Std-2.

All our tiny tots were excited to dance in the rain.

The Little rock stars of Pre-Primary danced to the thrilling music which infused the atmosphere with energy and fun.

They were filled with excitement and joy. Rain Dance Party helps the children to learn to love and develop motor skills which will make them physically fit.

Rain brings happiness and smile and so did the Rain Dance Party
